

U1P-Care | MULTIPURPOSE - #2 - RED

LITHIUM COMPLEX GREASE HIGH-TEMP

Services Product | United States

Product Description

Lubricating grease made with basic mineral oils, anhydrous calcium soap and antioxidant and anticorrosive additives, which are complemented with a Booster that provides excellent anti-rust properties and special characteristics for its performance as a multipurpose grease in several industrial applications.

Features and Benefits

- Oxidation resistance.
- Corrosion resistance.
- Anti-wear properties.
- Good pumpability.
- Anti-rust properties.
- Smooth appearance.
- Dropping point higher than 550 °F (287.778°C).

Applications

Due to its excellent properties, it covers the lubrication needs in specific areas of special processes and subjected to hostile environments, such as contamination by particles and water. Reducing the friction between surfaces, forming a protective layer to minimize oxidation and rust that could form in those working conditions.

Properties and Specifications*

Evidence	Method Test	Typical Value
NLGI grade	ASTM D217	2
Thickener	ASTM D128	Anhydrous Calcium
Color	Visual	Red
Worked penetration @ 60 strokes 1/10 mm 25°C	ASTM D2170	280
Dropping point, °C	ASTM D2265	288°C - 550°F

*Typical Properties are those obtained with normal production tolerance and do not constitute a specification. Variations that do not affect product performance are expected during normal manufacturing and at different mixing locations. The information contained in this document is subject to change without notice.
