

U1P-Duty - Conventional

Agriplus Multi-Purpose Hydraulic Fluid

Heavy-Duty | United States

Product Description

Ultra1Plus Agriplus Fluid is a versatile hydraulic fluid designed for use in applications requiring an SAE 20 fluid. This multi-functional fluid serves both as a hydraulic medium and a general lubricating fluid in non-critical applications. It offers economical and excellent lubrication across various uses and can also function as a compression fluid in non-critical settings. However, it is not recommended for use on mobile farms or construction equipment.

Features and Benefits

- **Lubrication:** Forms strong, long-lasting films on metallic surfaces, offering excellent lubrication for stationary, rolling, or sliding components in both enclosed and open-air applications.
- **Oxidation Protection:** The oil film acts as a barrier between components and air or water, reducing oxidation and rusting.
- **Economical Alternative:** Provides cost-saving benefits in non-critical applications and for leaking equipment that requires frequent fluid replacement.
- **Versatility:** The absence of aggressive additives makes **Agriplus** suitable for most non-critical applications where a zinc-free hydraulic oil is not required.

Application

Ultra1Plus Agriplus Fluid is designed as a versatile lubricant, suitable for applications that require SAE 20 lubricating oil.

Properties and Specifications

Parameters	Result
Density (Typical)	7.3
Viscosity @ 100°C, cSt, ASTM D445	6.9 – 9.3
Viscosity index, ASTM D2270	50-95
Pour point, °F (°C), ASTM D97	-25 (-32)
Flash point, °F (°C), ASTM D92	352 (178)

*Typical Properties are typical of those obtained with normal production tolerance and do not constitute a specification. Variations that do not affect product performance are to be expected during normal manufacture and at different blending locations. The information contained herein is subject to change without notice.
